

**PRESS STATEMENT****Strong Interest in Punggol Residences - New BTO Flats Offer Good Value**

HDB has received media queries on the subscription rate for the Punggol Residences development, which was launched via the Build-to-Order (BTO) system. A spokesperson from HDB commented, "Punggol Residences has received good response from flat buyers since its launch on 30 Jul 09. As at 2 pm on 12 Aug 09, 5,147 applications were received for the 769 Premium flats. This translates to a subscription rate of 6.7 times. The strong interest shows that homebuyers recognise that HDB's latest project offers good value for money. The application for this project will close on 12 Aug 09, midnight."

2 To date, HDB has launched about 2,800 flats under the BTO system. Given the strong demand, HDB will step up its supply of flats under BTO to as much as 8,000 or more. The consistently high subscription rates for the BTO projects in Punggol Town is testament that the town has become a much sought after place to live in. Hence, HDB plans to launch another BTO project in Punggol in Aug 09. The continued launch of new BTO projects in Punggol will further contribute towards realising the Punggol 21+ vision of a *Waterfront Town of the 21st Century*.

3 HDB is also monitoring the demand for flats in other towns and will launch new housing contracts in these towns under the BTO system where appropriate.
